The government will pay the bills

The Government Will Pay The Bills

The countdown has begun for "normalization" in electricity and natural gas. During the epidemic, the state loaded the electricity and gas of all residential subscribers and small businesses with debts of less than 1000 TL.

Good News from the Government to the Billing Victims

In energy, "normalization" will begin on July 1st. Until this date, the state will pay the electricity and natural gas bills of residential subscribers and small businesses.

As of this date, legislation on invoice reading and collection will be implemented. Accordingly, the electricity and gas cut of the subscriber who does not pay his debt within the stipulated period may be on the agenda.
